5 FOR THE NORTHERN DISTRICT OF CALIFORNIA  
6

7 IN RE:  
8 NATIONAL SECURITY AGENCY  
9 TELECOMMUNICATIONS RECORDS  
10 LITIGATION

MDL Docket No 06-1791 VRW

ORDER

11 This Document Relates To:  
12 07-1187, 07-1242, 07-1323,  
13 07-1324, 07-1326, 07-1396  
14 \_\_\_\_\_/

15 The government seeks to enjoin state officials in  
16 Missouri, Maine, New Jersey, Connecticut and Vermont from  
17 investigating various telecommunication carriers concerning their  
18 alleged disclosure of customer telephone records to the National  
19 Security Agency (NSA) based on the Supremacy Clause of the United  
20 States Constitution, the foreign affairs power of the federal  
21 government and the state secrets privilege.

22 Before these cases were transferred to this court by the  
23 Judicial Panel on Multidistrict Litigation (JPML) on February 15,  
24 2007, the government and various defendants filed cross motions for  
25 dismissal and summary judgment. With the exception of reply briefs  
26 in the Connecticut and Vermont cases, these motions were fully  
27 briefed prior to transfer. The court's scheduling order directed  
28 the parties to complete briefing in the Connecticut and Vermont  
cases and permitted the government and state officials to submit  
consolidated briefs addressing Ninth Circuit law and other issues  
not previously briefed. Doc #219.

1           Clayton v AT&T, 07-1187, arises out of investigative  
2 subpoenas issued to AT&T by two commissioners of the Missouri  
3 Public Service Commission (MoPSC) regarding information it  
4 allegedly disclosed to the NSA. Doc #1, Ex A. These subpoenas  
5 seek, for example,

- 6           (1) Any order, subpoena or directive of any court,  
7           tribunal or administrative agency or office  
8           whatsoever, directing or demanding the release of  
9           customer proprietary information relating to  
10          Missouri customers;
- 11          (2) The number of Missouri customers, if any, whose  
12          calling records have been delivered or otherwise  
13          disclosed to the [NSA]; and
- 14          (3) The nature or type of information disclosed to the  
15          NSA, including telephone number, subscriber name  
16          and address, social security numbers, calling  
17          patterns, calling history, billing information,  
18          credit card information, internet data and the  
19          like.

20 Doc #299, Ex A, tab 3.

21           Because the commissioners considered AT&T's response to  
22 be inadequate, they moved pursuant to Missouri law to compel AT&T  
23 to comply with the investigation in Missouri state court. AT&T  
24 then removed the case to the United States District Court for the  
25 Western District of Missouri. Shortly thereafter, the government  
26 initiated a separate Missouri action, United States v Gaw, 07-1242,  
27 on July 26, 2006, seeking declaratory and injunctive relief against  
28 the MoPSC and AT&T.

          The Maine case, United States v Adams, 07-1323, began  
after Maine citizens petitioned the Maine Public Utilities  
Commission (MePUC) to investigate whether Verizon had shared its  
customers' records with the NSA. Verizon submitted two press  
releases in response on May 12 and May 16, 2006, stating that (1)

1 the NSA never requested customer records and (2) if a government  
2 agency requested its customer records, Verizon would disclose them  
3 only when authorized by law. Doc #1, ¶ 40. On August 9, 2006,  
4 MePUC ordered Verizon to affirm under oath that its press releases  
5 were accurate. Id, ¶¶ 41-42; Doc #299, Ex A, tab 5. MePUC has not  
6 asked for any additional information from Verizon. See Doc #299,  
7 Ex A, tab 5. On August 21, 2006, the government sued in the United  
8 States District Court for the District of Maine to enjoin the MePUC  
9 from pursuing this inquiry. On February 8, 2007, Judge Woodcock  
10 preliminarily enjoined MePUC from enforcing the order. See United  
11 States v Adams, 473 F Supp 2d 108 (D Me 2007).

12 The New Jersey case, United States v Rabner, 07-1324,  
13 stems from the New Jersey Attorney General's investigation into  
14 whether telecommunication carriers disclosed to the NSA telephone  
15 call history data of New Jersey subscribers. Doc #1, ¶34. The New  
16 Jersey Attorney General issued *subpoenas duces tecum* pursuant to  
17 New Jersey consumer protection law to ten carriers doing business  
18 in New Jersey. These subpoenas include the following requests:

- 19 (1) All orders, subpoenas and warrants issued by or on  
20 behalf of any unit or officer of the Executive  
21 Branch of the Federal Government and provided to  
[the carriers] concerning any demand or request to  
provide telephone call history data to the NSA;
- 22 (2) All documents concerning an identification of  
23 customers \* \* \* whose telephone call history data  
24 was provided \* \* \* to the NSA; of the persons whose  
data was provided to the NSA; and
- 25 (3) All documents concerning any communication between  
26 [the carriers] and the NSA \* \* \* concerning the  
provision of telephone call history data to the  
NSA.

27 Doc #299, Ex A, tab 1. In response to these subpoenas, the  
28 government sued the New Jersey Attorney General in the United

1 States District Court for the District of New Jersey. Doc #1-1.

2 United States v Palermino, 07-1324, arises from a  
3 complaint filed by the American Civil Liberties Union of  
4 Connecticut (ACLU) requesting that the Connecticut Department of  
5 Public Utility Control (CtDPUC) investigate whether the local  
6 carriers violated Connecticut law. In response, the CtDPUC  
7 initiated an administrative proceeding and pursued the requested  
8 investigation. After the CtDPUC denied the carriers' motions to  
9 dismiss, ACLU filed its first set of interrogatories to each of the  
10 carriers, seeking information concerning potential illegal  
11 disclosure of customer records, such as the following:

- 12 (1) Did AT&T have any published privacy policy or  
13 policies concerning customer information and/or  
14 records in effect between September 11, 2001, and  
August 10, 2006?
- 15 (2) To the extent that any published privacy policy  
16 referenced in your response [above] changed during  
17 the relevant period, explain the specific terms  
that changed, when the changes occurred, and the  
reasons for the change.
- 18 (3) Without providing any details about the purpose(s)  
19 or target(s) of any investigation(s) or  
20 operations(s), at any time during the relevant  
period has AT&T ever received [a court order or a  
21 request under 18 USC § 2709, I e, a "national  
security letter"] seeking disclosure of customer  
information and/or records?

22 Doc #299, Ex A, tab 4. On September 6, 2006, the government sued  
23 in the United States District Court for the District of  
24 Connecticut.

25 In United States v Volz, 07-1396, the commissioner of the  
26 Vermont Department of Public Service (VtDPS) propounded information  
27 requests under Vermont law, 30 VSA § 206, to AT&T and Verizon  
28 concerning their conduct and policies vis-à-vis the NSA. 07-1396,

1 Doc #1, Ex C. After AT&T and Verizon failed to comply with the  
2 request, VtDPS petitioned the Vermont Public Service Board (VtPSB)  
3 to open investigations of the carriers, Id, ¶¶ 33-34, and  
4 eventually ordered the carriers to respond. Id, ¶ 37 & Ex I. This  
5 prompted the government to bring suit to enjoin VtPSB in the  
6 District Court of Vermont.

7           The parties' cross motions for summary judgment concern  
8 three issues: whether the state officials' investigations (1)  
9 violate the Supremacy Clause by regulating directly or  
10 discriminating against the federal government or conflicting with  
11 an affirmative command of Congress; (2) impinge on the foreign  
12 affairs power of the federal government; or (3) run afoul of the  
13 state secrets privilege.

14           In reviewing a summary judgment motion, the court must  
15 determine whether genuine issues of material fact exist, resolving  
16 any doubt in favor of the party opposing the motion. "[S]ummary  
17 judgment will not lie if the dispute about a material fact is  
18 'genuine,' that is, if the evidence is such that a reasonable jury  
19 could return a verdict for the nonmoving party." Anderson v  
20 Liberty Lobby, Inc, 477 US 242, 248 (1986). "Only disputes over  
21 facts that might affect the outcome of the suit under the governing  
22 law will properly preclude the entry of summary judgment." Id.  
23 And the burden of establishing the absence of a genuine issue of  
24 material fact lies with the moving party. Celotex Corp v Catrett,  
25 477 US 317, 322-23 (1986). When the moving party has the burden of  
26 proof on an issue, the party's showing must be sufficient for the  
27 court to hold that no reasonable trier of fact could find other  
28 than for the moving party. Calderone v United States, 799 F2d 254,

1 258-59 (6th Cir 1986). Summary judgment is granted only if the  
2 moving party is entitled to judgment as a matter of law. FRCP 56©.

3 The nonmoving party may not simply rely on the pleadings,  
4 however, but must produce significant probative evidence supporting  
5 its claim that a genuine issue of material fact exists. TW Elec  
6 Serv v Pacific Electrical Contractors Ass'n, 809 F2d 626, 630 (9th  
7 Cir 1987). The evidence presented by the nonmoving party "is to be  
8 believed, and all justifiable inferences are to be drawn in his  
9 favor." Anderson, 477 US at 255. "[T]he judge's function is not  
10 himself to weigh the evidence and determine the truth of the matter  
11 but to determine whether there is a genuine issue for trial." Id  
12 at 249.

13  
14 II

15 The court takes up jurisdictional issues first.  
16 In these suits, the government seeks both declaratory and  
17 injunctive relief, including: (1) a declaration that state  
18 investigations are invalid under and preempted by the Supremacy  
19 Clause; and (2) an order enjoining the state officials from  
20 investigating the carriers relating to their alleged disclosure of  
21 records to the NSA. These pleadings suffice to confer federal  
22 question jurisdiction under 28 USC §§ 1331 and 1345.

23 It is well-established that the federal courts have  
24 jurisdiction under 28 USC § 1331 over a preemption claim seeking  
25 injunctive and declaratory relief. See, e g, Verizon Md, Inc v Pub  
26 Serv Comm'n of Md, 535 US 635, 641-43 (2002). In Shaw v Delta Air  
27 Lines, Inc, 463 US 85, 96 & n14 (1983), the Supreme Court held:

28 //

1 A plaintiff who seeks injunctive relief from state  
2 regulation, on the ground that such regulation is  
3 preempted by a federal statute which, by virtue of  
4 the Supremacy Clause of the Constitution, must  
prevail, thus presents a federal question which the  
federal courts have jurisdiction under 28 USC §  
1331 to resolve.

5 See also Bud Antle, Inc v Barbosa, 45 F3d 1261, 1362 (9th Cir 1994)  
6 ("Even in the absence of an explicit statutory provision  
7 establishing a cause of action, a private party may ordinarily seek  
8 declaratory and injunctive relief against state action on the basis  
9 of federal preemption."); United States v Morros, 268 F3d 695, 702-  
10 03 (9th Cir 2001), citing Bell v Hood, 327 US 678, 681-82 (1946)  
11 (conferring federal question jurisdiction for claims by government  
12 that seek relief "directly under the Constitution or laws of the  
13 United States" in challenging the actions of state officials under  
14 the Supremacy Clause); Richard H Fallon, et al, Hart and Wechler's  
15 The Federal Courts and the Federal System 903 (5th ed 2003).

16 An alternative ground for federal question jurisdiction  
17 is furnished by 28 USC § 1345, which "provides the district courts  
18 with original jurisdiction of all civil actions commenced by the  
19 United States," thereby creating "independent subject matter  
20 jurisdiction." Morros, 268 F3d at 702-03. Accordingly, the court  
21 finds that jurisdiction lies in federal court under 28 USC §§ 1331  
22 and 1345.

23 A second hurdle to reaching the merits in these cases is  
24 that the government lacks an express cause of action. The  
25 government describes three means of remedying this omission, one of  
26 which the court can easily dispense with. The government errs in  
27 arguing that the existence of jurisdiction itself gives rise to a  
28 cause of action. It is firmly established by the Supreme Court

1 that the vesting of jurisdiction does not in and of itself give  
2 rise to a cause of action. Texas Industries, Inc v Radcliff  
3 Materials, Inc, 451 US 630, 640-41 (1981). Nor do the statutes  
4 relied on for jurisdiction create substantive causes of action.  
5 Hence, to secure a cause of action for these suits, the government  
6 must look elsewhere.

7           One option for establishing a cause of action lies with  
8 an obscure line of cases culminating in In re Debs, 158 US 564  
9 (1895), which permit the government to sue to vindicate its  
10 sovereign interests even when not authorized by statute. See also  
11 Dugan v United States, 16 US 172 (1818); United States v Tingey, 30  
12 US 115 (1831); Cotton v United States, 52 US 229 (1851); Jessup v  
13 United States, 106 US 147 (1882). Debs involved an attempt by the  
14 federal government to enjoin the Pullman labor strike of 1894. 158  
15 US at 577. The Court upheld the propriety of the injunction,  
16 proclaiming that

17           [e]very government, entrusted, by the very terms of  
18 its being, with powers and duties to be exercised  
19 and discharged for the general welfare, has a right  
20 to apply to its own courts for any proper assistance  
in the exercise of the one and the discharge of the  
other \* \* \*.

21 In spite of the Court's high-flying rhetoric, the Debs doctrine has  
22 seldom been invoked in the century-plus since its inception.

23 "[R]elatively little has been made of this broad authorization to  
24 sue because in most instances, the federal government has sued  
25 pursuant to federal statutes and not based on its inherent interest  
26 in protecting its citizens." Erwin Chemerinsky, Federal  
27 Jurisdiction, § 2.3 (Aspen 2003).

28 //

1           The contours of the doctrine enunciated in Debs remain  
2 unclear, not least due to the vague guidance offered by the Debs  
3 Court.

4           [I]t is not the province of the government to  
5 interfere in any mere matter of private controversy  
6 between individuals, or to use its great powers to  
7 enforce the rights of one against another, yet,  
8 whenever the wrongs complained of are such as affect  
9 the public at large, and are in respect of matters  
10 which by the Constitution are entrusted to the care  
11 of the Nation, and concerning which the Nation owes  
12 the duty to all the citizens of securing to them  
13 their common rights, then the mere fact that the  
14 government has no pecuniary interest in the  
15 controversy is not sufficient to exclude it from the  
16 courts, or prevent it from taking measures therein  
17 to fully discharge those constitutional duties.

18 Debs, 158 US at 586.

19           Under its most expansive reading, Debs authorizes the  
20 government to sue without statutory authorization whenever the  
21 alleged violations "affect the public at large." 158 US at 586.  
22 Such a broad mandate has led the government to invoke Debs in  
23 varied circumstances, including in suits to enforce immunity of the  
24 armed forces from certain state taxes, see United States v  
25 Arlington County, 326 F2d 929 (4th Cir 1964), to enforce civil  
26 rights under the Commerce Clause, see United States v Jackson, 318  
27 F2d 1 (5th Cir 1963), and to enjoin sellers from obtaining default  
28 judgments without proper service of process, see United States v  
Brand Jewelers, Inc, 318 F Supp 1293 (SDNY 1970). Most relevant  
here, the government has succeeded in invoking this doctrine in  
disputes over interference with national security. United States v  
Marchetti, 466 F2d 1309 (4th Cir 1972) (protection of contractual  
rights in addition to national security interest). See also United  
States v Mattson, 600 F2d 1295, 1298 (9th Cir 1979) ("Where

1 interference with national security has been at issue, courts have  
2 also relied on the doctrine to reach the merits of the  
3 controversy.")

4           The state officials draw the court's attention to Justice  
5 Black's concurring opinion in New York Times Co v United States,  
6 403 US 713, 718 (1971), which gives reason for restraint in  
7 applying Debs. Justice Black cautioned that invocation of Debs  
8 invites the government - that is, the executive branch - to exceed  
9 its constitutional grant to ensure that the laws are faithfully  
10 executed.

11           It would, however, be utterly inconsistent with the  
12 concept of separation of powers for this Court to  
13 use its power of contempt to prevent behavior that  
14 Congress has specifically declined to prohibit. \* \*  
15 \* The Constitution provides that Congress shall make  
16 laws, the President execute laws, and courts  
17 interpret laws. It did not provide for government  
18 by injunction in which the courts and the Executive  
19 branch can 'make laws' without regard to the action  
20 of Congress. It may be more convenient for the  
21 Executive Branch if it need only convince a judge to  
22 prohibit conduct rather than ask the Congress to  
23 pass a law, and it may be more convenient to enforce  
24 a contempt order than to seek a criminal conviction  
25 in a jury trial. Moreover, it may be considered  
26 politically wise to get a court to share the  
27 responsibility for arresting those who the Executive  
28 Branch has probable cause to believe are violating  
the law. But convenience and political  
considerations of the moment do not justify a basic  
departure from the principles of our system of  
government.

403 US 713, 718 (1971) (citations omitted).

          In view of these separation of powers concerns, the court  
agrees with the state officials that mere incantation of "sovereign  
interests" does not suffice under Debs to generate a cause of  
action. But even a narrow construction of Debs cannot prevent the  
doctrine's application here. Although the state officials insist

1 on casting these investigations as garden variety  
2 telecommunications regulation, it cannot be gainsaid that the  
3 officials' efforts bear particularly on the government's national  
4 security interests. Whatever the boundaries of the Debs, the court  
5 is confident that these suits fall well within its borders. See  
6 Mattson, 600 F2d at 1298 ("Where interference with national  
7 security has been at issue, courts have also relied on the doctrine  
8 to reach the merits of the controversy."). Debs is thus properly  
9 invoked by the government in these cases.

10 As an alternative to relying on Debs, the government  
11 asserts that the Supremacy Clause of the Constitution creates an  
12 implied right of action to enjoin state regulations that are  
13 preempted by a federal statutory or constitutional provision. The  
14 Supreme Court implicitly supported such a right in Pharmaceutical  
15 Research and Manufacturers of America v Walsh, 538 US 644 (2003).  
16 Plaintiffs in that case argued - without a cause of action - that a  
17 state regulation was preempted by Medicaid, a federal Spending  
18 Clause statute. Only two Justices declined to reach the merits of  
19 plaintiff's claim for reason that no claim was stated. The  
20 remaining Justices - a plurality of four and three in dissent -  
21 proceeded to the merits without pause, tacitly deciding that an  
22 implied claim was stated for preemption.

23 The DC Circuit relied on Walsh in rejecting a state  
24 agency's contention that plaintiffs "have no private right of  
25 action for injunctive relief against the state" based on the  
26 preemptive force of a federal statute. Pharmaceutical Research and  
27 Manufacturers of America v Thompson, 362 F3d 819 (DC Cir 2004).  
28 "By addressing the merits of the parties' arguments without mention

1 of any jurisdictional flaw," the court explained, "seven Justices  
2 appear to have *sub silentio* found no flaw." 362 F3d at 819 n3. See  
3 also Planned Parenthood v Sanchez, 403 F3d 324 (5th Cir 2005).

4           The court concurs with the DC Circuit's reasoning. By  
5 entertaining federal preemption suits, see e g, Walsh, 538 US 644,  
6 Verizon Maryland, Inc, 535 US 635 (2002), the Supreme Court has  
7 cleared the path for parties to seek declaratory and injunctive  
8 relief against state action on the basis of federal preemption  
9 alone. This implied cause of action, in conjunction with the  
10 proper invocation of Debs, provides two grounds for the government  
11 to proceed in these cases.

12           Even if the government has jurisdiction and a cause of  
13 action, several state officials urge this court to abstain from  
14 exercising jurisdiction over these suits pursuant to the Younger v  
15 Harris, 401 US 37 27 (1971), line of cases, which hold that  
16 principles of comity and federalism require federal courts to  
17 abstain from enjoining pending state proceedings. See also Ohio  
18 Civil Rights Comm'n v Dayton Christian Schools, Inc, 477 US 619,  
19 627 (1986) (extending the Younger doctrine to certain state  
20 administrative proceedings, so long as those proceedings are  
21 "judicial in nature").

22           In the Ninth Circuit, however, the federal government  
23 may bypass the Younger hurdle when it acts as a litigant. See  
24 United States v Morros, 268 F3d 695 (9th Cir 2001). According to  
25 the Morros court, if the federal government seeks relief against a  
26 state or its officers, it makes little sense to hew to the  
27 principles of comity and federalism that animate Younger because  
28 "the state and federal governments are in direct conflict before

1 they arrive at the federal courthouse," rendering futile "any  
2 attempt to avoid a federal-state conflict." Id (citing United  
3 States v Composite State Bd of Medical Examiners, 656 F2d 131, 136  
4 (5th Cir 1981). The Ninth Circuit's reasoning in Morros  
5 undoubtedly applies here. The possibility of avoiding "unnecessary  
6 conflict between state and federal governments," Composite State,  
7 656 F2d at 136, faded long before these cases arrived to this  
8 court. Because such a conflict inheres in these cases, Younger  
9 abstention is inapplicable.

10 The court finally turns to the argument advanced in three  
11 of these cases that no case or controversy exists because the state  
12 officials have not attempted to enforce its statutes and  
13 regulations against the carriers. Ripeness is one of the four  
14 justiciability doctrines that stem from the Article III limitation  
15 of the federal judicial power to cases or controversies.  
16 Accordingly, "whether a claim is ripe for adjudication goes to a  
17 court's subject matter jurisdiction \* \* \*." St Clair v City of  
18 Chico, 880 F2d 199, 201 (9th Cir 1989), quoted in Schwarzer et al,  
19 Federal Civil Procedure Before Trial § 2:178 (1997). The standard  
20 to be applied in determining if there is a case or controversy ripe  
21 for resolution is whether there is "a reasonable threat of  
22 prosecution for conduct allegedly protected by the Constitution."  
23 Ohio Civil Rights Comm'n v Dayton Christian Schools, 477 US 619,  
24 626 n1 (1986).

25 Because the state officials have made plain their  
26 intention to subject the carriers to investigation, the court  
27 agrees with the government that the carriers face a reasonable  
28 threat of prosecution and thus there is before the court a ripe

1 case or controversy. Cf Public Utilities Comm'n v United States,  
2 355 US 534, 538 (1958) (allowing preenforcement review of a state  
3 regulation that required common carriers to receive state  
4 pre-approval before offering reduced shipping rates to the United  
5 States where the state had "plainly indicated an intent to enforce  
6 the Act"); see also Mobil Oil Corp v Virginia, 940 F2d 73, 76 (4th  
7 Cir 1991) (allowing preenforcement review of amendments to the  
8 Virginia Petroleum Products Franchise Act, which an oil company  
9 claimed were preempted, even though Virginia had not specifically  
10 indicated that it intended to enforce that statute against  
11 plaintiffs, because the Virginia "Attorney General [had] not \* \* \*  
12 disclaimed any intention of exercising her enforcement authority").

13  
14 III

15 Turning to the merits, these cases concern whether the  
16 state laws underlying the investigations run afoul of the Supremacy  
17 Clause, the federal foreign affairs power or state secrets  
18 privilege. State law may violate the Supremacy Clause in two ways:  
19 the law may regulate directly or discriminate against the  
20 government, see McCulloch v Maryland, 4 Wheat 316, 425-437 (1819),  
21 or the law may conflict with an affirmative command of Congress,  
22 see Gibbons v Ogden, 9 Wheat 1, 211 (1824); see also Hillsborough  
23 County v Automated Medical Laboratories, Inc, 471 US 707, 712-713  
24 (1985). The government's attack on the investigations relies on  
25 both grounds of invalidity.

26 //

27 //

28 //

A

It is a fundamental principle of our law "that the constitution and the laws made in pursuance thereof are supreme; that they control the constitution and laws of the respective States, and cannot be controlled by them." McCulloch v Maryland, 4 Wheat 316, 426 (1819). From this principle is derived the corollary that "the activities of the Federal Government are free from regulation by any state." Hancock v Train, 426 US 167, 178 (1976). As Justice Holmes observed in Johnson v Maryland, 254 US 51, 57 (1920):

[T]he immunity of the instruments of the United States from state control in the performance of their duties extends to a requirement that they desist from performance until they satisfy a state officer upon examination that they are competent for a necessary part of them.

The doctrine that embodies these principles - termed intergovernmental immunity - prevents state laws from regulating directly or discriminating against the federal government.

The Supreme Court's modern-day treatment of the intergovernmental immunity doctrine has been marked by restraint, making plain the doctrine has no application here. Although the pertinent state disclosure orders, Doc #299, Ex A, relate to federal government activities, they do not regulate the government directly; indeed, they impose no duty on the government. See United States v New Mexico, 455 US 720 (1982). The Court upheld analogous regulations in North Dakota v United States, 495 US 423, 437 (1990), which involved laws requiring out-of-state shippers of alcohol to file monthly reports and to affix a label to each bottle of liquor sold to federal military enclaves. Id at 426. The Court

1 reasoned that because the laws operated on suppliers, not the  
2 government, "[t]here is no claim \* \* \*, nor could there be, that  
3 North Dakota regulates the Federal Government directly." Id at  
4 436-37. That conclusion leaves no doubt that the state  
5 investigations operate on the carriers alone.

6 Nor can it be said that the investigations "discriminate  
7 against the federal government or those with whom it deals." North  
8 Dakota v United States, 495 US 423, 437 (1990). The  
9 nondiscrimination rule prevents states from meddling with federal  
10 government activities indirectly by singling out for regulation  
11 those who deal with the government. This rule does not, however,  
12 oblige special treatment. A "[s]tate does not discriminate against  
13 the Federal Government and those with whom it deals unless it  
14 treats someone else better than it treats them." Washington v  
15 United States, 460 US 536, 544-45 n10 (1983). Applying these  
16 principles, the Court has required that regulations be imposed  
17 equally on all similarly situated constituents of a state and not  
18 based on a constituent's status as a government contractor or  
19 supplier. See United States v County of Fresno, 429 US 452,  
20 462-464 (1977).

21 The nondiscrimination analysis should not "look to the  
22 most narrow provision addressing the Government or those with whom  
23 it deals. A state provision that appears to treat the Government  
24 differently on the most specific level of analysis may, in its  
25 broader regulatory context, not be discriminatory." North Dakota,  
26 495 US at 438. The asserted laws at issue here regulate equally  
27 all public utilities, making no distinction based on the  
28 government's involvement. Although the present investigation, in

1 targeting alleged disclosure of call records to the NSA, may  
2 "appear[] to treat the government differently," the regulatory  
3 regime as whole treats any unauthorized disclosure the same. These  
4 neutral state laws regulating the carriers "are but normal  
5 incidents of the organization within the same territory of two  
6 governments." North Dakota, 495 US at 435, citing Helvering v  
7 Gerhardt, 304 US 405, 422 (1938).

8           The government presents an impressive patchwork of dicta  
9 in support of its theory, but none of the cases it cites pertains  
10 to the present facts. Hancock v Train, 426 US 167, 174 (1976), for  
11 example, concerns a state attorney general's efforts to require the  
12 United States Army, the Tennessee Valley Authority and the Atomic  
13 Energy Commission to obtain state air pollution permits for  
14 facilities on federal installations. The Hancock Court found  
15 decisive the fact that the regulations "place[d] a prohibition on  
16 the federal government" – a feature absent here. Both Mayo v  
17 United States, 319 US 441, 447 (1943), and City of Los Angeles v  
18 United States, 355 F Supp 461, 464 (CF Cal 1972), prove equally  
19 unavailing for the government. In both cases, plaintiffs sought to  
20 exact fees directly from a government entity. Again, no equivalent  
21 interplay between the public utilities and the federal government  
22 exists here.

23           In sum, because the investigations neither regulate  
24 directly nor discriminate against the federal government, the  
25 investigations do not violate the doctrine of intergovernmental  
26 immunity.

27 //

28 //

B

The court turns to the government's preemption argument. By virtue of the Supremacy Clause, it is a "fundamental principle of the Constitution \* \* \* that Congress has the power to preempt state law." Crosby v Nat'l Foreign Trade Council, 530 US 363, 372 (2000) (citing US Const, Art VI, cl 2). The Supreme Court cautions, however, that "despite the variety of these opportunities for federal preeminence, we have never assumed lightly that Congress has derogated state regulation, but instead have addressed claims of preemption with the starting presumption that Congress does not intend to supplant state law." New York State Conference of Blue Cross & Blue Shield Plans v Travelers Insurance Co, 514 US 645, 654 (1995). Accordingly, "the purpose of Congress is the ultimate touchstone" of any preemption analysis. Cipollone v Liggett Group, 505 US 504, 516 (1992) (citation omitted).

State law must yield to federal law in three situations. First, state law may be preempted if Congress has expressly so provided. Gade v National Solid Wastes Mgm't Ass'n, 505 US 88 (1992). Second, under field preemption, "[i]f Congress evidences an intent to occupy a given field, any state law falling within that field is preempted." Silkwood v Kerr-McGee Corp, 464 US 238, 248 (1984) (citing Fidelity Federal Savings & Loan Ass'n v de la Cuesta, 458 US 141, 153 (1982)). Finally, under conflict preemption, "[i]f Congress has not entirely displaced state regulation over the matter in question, state law is still preempted to the extent it actually conflicts with federal law, that is, when it is impossible to comply with both state and federal law \* \* \* or where the state law stands as an obstacle to

1 the accomplishment of the full purposes and objectives of  
2 Congress." *Id* (citing Florida Lime & Avocado Growers, Inc v Paul,  
3 373 US 132, 142-43 (1963) and Hines v Davidowitz, 312 US 52, 67  
4 (1941)). The government contends that express, field and conflict  
5 preemption apply to the state investigations.

6  
7 1

8 State law is preempted insofar as Congress has expressly  
9 stated its intent to supersede state law. Shaw v Delta Air Lines,  
10 Inc, 463 US 85, 95-98 (1983). The task of statutory construction  
11 of an expressed preemption clause "must in the first instance focus  
12 on the plain wording of the clause, which necessarily contains the  
13 best evidence of Congress' preemptive intent." CSX Transportation,  
14 Inc v Easterwood, 507 US 658, 664 (1993). If Congress intends to  
15 alter the usual constitutional balance between the states and the  
16 federal government, it must make its intention to do so  
17 unmistakably clear in the language of the statute. Rice v Santa Fe  
18 Elevator Corp, 331 US 218, 230 (1947). The plain statement rule,  
19 as applied to expressed preemption, "is nothing more than an  
20 acknowledgment that the states retain substantial sovereign powers  
21 under our constitutional scheme, powers with which Congress does  
22 not readily interfere." Gregory v Ashcroft, 501 US 452, 461.

23 Little more than a paragraph in the briefing is devoted  
24 to the contention that federal law – namely, the Stored  
25 Communications Act ("SCA"), 18 USC § 2701 et seq – preempts  
26 expressly the state laws at issue here. The SCA, which was enacted  
27 as part of the Electronic Communications Privacy Act of 1986  
28 ("ECPA"), Pub L No 99-508, 100 Stat 1848 (1986), regulates

1 disclosure of non-content "record[s] or other information  
2 pertaining to a subscriber." 18 USC § 2702©. Relevant to the  
3 issue of preemption, the SCA specifies that "[t]he remedies and  
4 sanctions described in this chapter are the only judicial remedies  
5 and sanctions for nonconstitutional violations of this chapter."  
6 Id § 2708.

7 As the court concluded in its order denying remand in  
8 Riordan, 06-3574, and Campbell, 06-3596, section 2708 of the SCA  
9 serves a limited purpose: to prevent criminal defendants from  
10 suppressing evidence based on electronic communications or customer  
11 records obtained in violation of ECPA's provisions. Doc #130 at 6.  
12 The government gives no reason to revisit this issue. Accordingly,  
13 the court concludes that federal law does not expressly preempt the  
14 states laws at issue here.

15  
16 2

17 Even if a federal statute does not expressly preempt  
18 state law, it may do so by implication. Field preemption is found  
19 if the federal so thoroughly regulates a legislative field that  
20 Congress intended it to be occupied exclusively by the federal  
21 government. Freightliner Corp v Myrick, 514 US 280, 287 (1995).  
22 If a "scheme of federal regulation \* \* \* [is] so pervasive as to  
23 make reasonable the inference that Congress left no room for the  
24 States to supplement it," or if an Act of Congress "touches a field  
25 in which the federal interest is so dominant that the federal  
26 system will be assumed to preclude enforcement of state laws on the  
27 same subject," field preemption exists. English v General Electric  
28 Co, 496 US 72, 79 (1990); Rice, 331 US at 230. Because Congress

1 left room for state regulation of public utilities and their  
2 consumers' privacy, field preemption fails.

3           As discussed in the court's remand order, see Doc #130 at  
4 7, the preemptive force of the Foreign Intelligence Surveillance  
5 Act ("FISA") is undercut by the statute's language that  
6 contemplates state court litigation concerning illegal  
7 surveillance. For example, section 1806(f), in pertinent part,  
8 provides procedures for consideration of the propriety of FISA  
9 orders "[w]herever \* \* \* any motion or request is made by an  
10 aggrieved person pursuant to any other statute or rule of \* \* \* any  
11 state before any court or other authority of \* \* \* any state to  
12 discover or obtain applications or orders of other materials  
13 relating to electronic surveillance \* \* \* ." 50 USC 1806(f). The  
14 statutory exemption in 1861(e) also implies the availability of  
15 civil claims with respect to the production of records. It  
16 provides that a "person who, in good faith, produces tangible  
17 things under an order pursuant to this section shall not be liable  
18 to any other person for such production." 50 USC 1861(e). FISA  
19 thus contemplates that, in the absence of a government order for  
20 the business records under 50 USC 1861(a)(1), injured parties will  
21 have causes of action and remedies under other provisions of state  
22 and federal law.

23           These provisions in FISA suggest that Congress did not  
24 intend to foreclose state involvement in the area of surveillance  
25 regulation. As such, it cannot be said that the scheme of federal  
26 regulation here is "so pervasive as to make reasonable the  
27 inference that Congress left no room for the States to supplement  
28 it." English, 496 US at 79.

Finally, state action is preempted to the extent it actually conflicts with federal statutes, regulations or the Constitution. Barnett Bank of Marion County, NA v Nelson, 517 US 25, 31 (1996). Conflict preemption is found if it is "impossible for a private party to comply with both state and federal requirements" or if state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." Freightliner Corp v Myrick 514 US 280, 287 (1995); Geier v American Honda Motor Co, 529 US 861, 873 (2000).

In support of conflict preemption, the government relies chiefly on two statutory privileges, first citing to section 6 of the National Security Agency Act of 1959, 50 USC § 402 note 6, which provides:

[N]othing in this act or any other law \* \* \* shall be construed to require the disclosure of the organization or any function of the National Security Agency, of any information with respect to the activities thereof, or of the names, titles, salaries, or number of persons employed by such agency. 50 USC § 402, n6, sec 6(a) (emphasis added).

The government also relies on 50 USC § 403-1(i)(1), which states, "[t]he Director of National Intelligence shall protect intelligence sources and methods from unauthorized disclosure." The overarching issue is whether compliance with both federal and state regulations is a physical impossibility or whether the state investigations "stand[] as an obstacle to the accomplishment of the full purposes and objectives of Congress." Silkwood, 464 US at 248. For reasons discussed below, the court finds that neither of these provisions compels preemption.

//

1 Compliance with both federal and state regulations is not  
2 a physical impossibility, at least in view of "the circumstances of  
3 [the] particular case." Florida Lime & Avocado Growers, Inc v  
4 Paul, 373 US 132, 142-43 (1963). "What is a sufficient obstacle is  
5 a matter of judgment, to be informed by examining the federal  
6 statute as a whole and identifying its purpose and intended  
7 effects." Crosby v National Foreign Trade Council, 530 US 363, 373  
8 (2000)

9 For when the question is whether a Federal act  
10 overrides a state law, the entire scheme of the  
11 statute must of course be considered and that which  
12 needs must be implied is of no less force than that  
13 which is expressed. If the purpose of the act  
14 cannot otherwise be accomplished -- if its  
operation within its chosen field else must be  
frustrated and its provisions be refused their  
natural effect -- the state law must yield to the  
regulation of Congress within the sphere of its  
delegated power.

15 Crosby, 530 US at 373 (citing Savage v Jones, 225 US 501, 533  
16 (1912)).

17 Applying this standard, the court cannot conclude that  
18 the state investigations will inevitably conflict with federal law.  
19 In Hepting, 06-672, the government argued that the information  
20 covered by the section 6 statutory privilege is "at least co-  
21 extensive with the assertion of the state secrets privilege by the  
22 DNI." 06-672, Doc #124 at 14. Insofar as section 6 proscribes  
23 disclosure that would otherwise fall within the state secrets  
24 privilege, no conflict exists, as the government may intervene and  
25 assert the state secrets privilege in any of these proceedings. A  
26 conflict may arise, however, to the extent the state officials seek  
27 information covered by section 6 that lies outside the scope of the  
28 state secrets privilege. The court doubts whether any of the these

1 investigations would engender such a conflict, especially given the  
2 government's insistence that all information sought by the state  
3 officials implicates the state secrets privilege. Regardless, it  
4 would be inappropriate for the court to rule on the scope of this  
5 possible conflict in the abstract. See Time Warner Entm't Co, LP v  
6 FCC, 56 F3d 151, 195 (DC Cir 1995) ("[W]hether a state regulation  
7 unavoidably conflicts with national interests is an issue incapable  
8 of resolution in the abstract.").

9 Under the obstruction strand of conflict preemption,  
10 state law is preempted to the extent it actually interferes with  
11 the "methods by which the federal statute was designed to reach  
12 [its] goal." Int'l Paper Co v Ouellette, 479 US 481, 494 (1987);  
13 Verizon North, Inc v Strand, 309 F3d 935, 940 (6th Cir 2002). In  
14 making this determination, courts "consider the relationship  
15 between state and federal laws as they are interpreted and applied,  
16 not merely as they are written." Jones v Rath Packing Co, 430 US  
17 519, 526 (1977); Time Warner, 56 F3d at 195 ("[W]hether a state  
18 regulation unavoidably conflicts with national interests is an  
19 issue incapable of resolution in the abstract.") (quoting Alascom,  
20 Inc v FCC, 727 F2d 1212, 1220 (DC Cir 1984)). Hence, obstruction  
21 preemption focuses on both the objective of the federal law and the  
22 method chosen by Congress to effectuate that objective, taking into  
23 account the law's text, application, history and interpretation.

24 To support obstruction, the government avers that any  
25 litigation touching upon the statutory privileges must *ipso facto*  
26 obstruct Congress' purpose. But such a view misapprehends the  
27 federal law's purpose by ignoring the bulk of Congress's activity  
28 in this realm. For example, inquiry into activity not sanctioned

1 by the Pen Register Act, 18 USC § 3121, or FISA, falls outside of  
2 section 6's ambit. The Pen Register Act provides that "no person  
3 may install or use a pen register or a trap and trace device  
4 without first obtaining a court order under section 3123 of this  
5 title [18 USCS § 3123] or under the [FISA]." 18 USC § 3121(a).  
6 Similarly, FISA requires an application under oath attesting to  
7 eleven qualifying conditions, including the purpose of the  
8 investigation, and the persons to be investigated, as well as that  
9 the information likely to be obtained is foreign intelligence  
10 information not concerning a "United States person." 50 USC §  
11 1804(a)(1) to (11). Both of these statutes counter the  
12 government's myopic view of federal law in this area.

13 In further support of its conflict-preemption argument,  
14 the government points to 18 USC § 798(a), a statute that makes it a  
15 crime to divulge improperly any classified information "concerning  
16 the communication intelligence activities of the United States."  
17 18 USC § 798(a). Because the disclosure under the subpoenas is not  
18 "authorized," such disclosures may violate federal law. Yet the  
19 term "classified information" for purposes of 18 USC 798(a) means  
20 "information which, at the time of a violation of this section, is,  
21 for reasons of national security, specifically designated by a  
22 United States Government Agency for limited or restricted  
23 dissemination or distribution." 18 USC § 798(b). And the  
24 government does not purport to have designated as classified the  
25 records at issue here; indeed, it has not acknowledged that the  
26 carriers even divulged records to the NSA. As such, no conflict  
27 exists with 18 USC §798(a) until the government "specifically  
28 designate[s]" the records pertinent to the cases at bar. Even if

1 the pertinent records fall under 18 USC § 798(a), the  
2 aforementioned statutory privileges – not to mention the state  
3 secrets privilege – furnish the government with more than enough  
4 protection against any conflict.

5           Finally, the government contends that presidential  
6 executive orders aimed at protecting national security information  
7 conflict with the state investigations. Executive orders, in and  
8 of themselves, do not preempt state law. Congress has the  
9 exclusive power to make laws necessary and proper to carry out the  
10 powers vested by the United States Constitution in the federal  
11 government. Youngstown Sheet & Tube Co v Sawyer, 343 US 579  
12 (1952). Only when executive orders are necessary as a means of  
13 carrying out federal laws do they preempt state law. Cf Fidelity  
14 Federal Sav & Loans Ass'n, 458 US at 154 (administrative  
15 regulations may preempt state law when Congress has delegated that  
16 rule-making power).

17           Executive order 12,958 directs agencies to control  
18 strictly the classified information in their possession and to  
19 ensure that information is disclosed only when doing so is "clearly  
20 consistent with the interests of national security." 60 Fed Reg  
21 19825. Similarly, executive order number 12,968 (60 Fed Reg 40245)  
22 establishes a security program for access to information by non-  
23 government employees and 36 CFR § 1222.42(b) requires that when  
24 "nonrecord material containing classified information is removed  
25 from the executive branch, it is protected under conditions  
26 equivalent to those required of executive branch agencies \* \* \*."

27           The government attempted to explain why these orders are  
28 necessary as a means of carrying out federal laws, as required for

1 preemption, for the first time at oral argument. Without the  
2 benefit of briefing, however, it remains uncertain whether these  
3 executive orders amount to anything more than mere expressions of  
4 executive will. But even supported by an act of Congress, these  
5 orders cannot carry the day for the government. Again, no conflict  
6 inheres because for any information sought in violation of these  
7 orders the government may exercise its privileges, statutory or  
8 otherwise.

9           Accordingly, the government cannot show the requisite  
10 conflict because, based on the present record, the investigations  
11 do not require an act by the carriers that federal law or policy  
12 deems unlawful. Nor do the investigations pose an obstacle to the  
13 purposes and objectives of Congress. Should it occur that  
14 information sought by the states implicates the aforementioned  
15 executive orders but falls outside the state secrets privilege, the  
16 court will entertain a renewed motion from the government based on  
17 conflict preemption.

18  
19 C

20           Even if no federal activity preempts the state laws at  
21 issue here, the state investigations are said to infringe on the  
22 foreign affairs power of the federal government under Zschernig v  
23 Miller, 389 US 429 (1968). The national government's exclusive  
24 authority to regulate the foreign affairs of the United States has  
25 long been recognized as a constitutional principle of broad scope.  
26 See United States v Pink, 315 US 203, 233 (1942) ("Power over  
27 external affairs is not shared by the States; it is vested in the  
28 national government exclusively."); Hines v Davidowitz, 312 US 52,

1 63 (1941). "It follows that all state action, whether or not  
2 consistent with current foreign policy, that distorts the  
3 allocation of responsibility to the national government for the  
4 conduct of American diplomacy is void as an unconstitutional  
5 infringement on an exclusively federal sphere of responsibility."  
6 Laurence H Tribe, American Constitutional Law § 4-5 at 656 (3d ed  
7 2000).

8           This principle, which prohibits state action that unduly  
9 interferes with the federal government's authority over foreign  
10 affairs, derives from both the text and structure of the  
11 Constitution. The Constitution allocates power for external  
12 affairs to the legislative and executive branches of the national  
13 government and simultaneously prohibits the states from engaging in  
14 activities that might interfere with the national government's  
15 exercise of these powers. To be sure, no clause in the  
16 Constitution explicitly bestows a "foreign affairs power" to the  
17 federal government. See L Henkin, Foreign Affairs and the United  
18 States Constitution 14-15 (2d ed 1996). But a number of  
19 provisions, when read together, strongly imply that such authority  
20 was intended. See Harold G Maier, Preemption of State Law: A  
21 Recommended Analysis, 83 Am J Int'l L 832, 832 (1989) ("[N]either  
22 the Articles of Confederation nor the Constitution provided for a  
23 general foreign affairs power. Nonetheless, there was never any  
24 real question that the United States would act as a single nation  
25 in the world community.").

26           Specifically, the Constitution provides that Congress  
27 possesses the authority "to lay and collect Taxes, Duties, Imposts  
28 and Excises, to pay the Debts and provide for the common Defense

1 and general Welfare of the United States," US Const art I, § 8, cl  
2 1, "to regulate Commerce with foreign Nations," id, cl 3, and "to  
3 define and punish Piracies and Felonies committed on the high Seas,  
4 and Offences against the Law of Nations," id, cl 10. Additionally  
5 Congress is granted the power "to declare War, grant Letters of  
6 Marque and Reprisal, and make Rules concerning Captures on Land and  
7 Water," id, cl 11, and the President is designated the "Commander  
8 in Chief of the Army and Navy of the United States," id, art II, §  
9 2, cl 1.

10 With respect to the states, the Constitution directs that  
11 "no State shall enter into any Treaty, Alliance, or Confederation;  
12 grant Letters of Marque and Reprisal" or, without the consent of  
13 Congress, "lay any Imposts or Duties on Imports or Exports" or  
14 "enter into any Agreement or Compact \* \* \* with a foreign Power,"  
15 or "engage in War, unless actually invaded, or in such imminent  
16 Danger as will not admit of delay." Id, § 1, cl 10.

17 These and other constitutional provisions evidence an  
18 intent on the part of the framers to grant paramount authority for  
19 foreign affairs to the political branches of the federal  
20 government, thereby necessitating the exclusion of intrusive  
21 efforts on the part of the states in foreign relations. The  
22 Supreme Court enshrined these principles in Zschernig v Miller, 389  
23 US 429 (1968), in which the Court announced the foreign affairs  
24 doctrine that governs the cases at bar.

25 Zschernig involved an Oregon probate statute that  
26 conditioned the inheritance rights of an alien not residing in the  
27 United States on his ability to prove that American heirs would  
28 have a reciprocal right to inherit estates in the foreign country

1 and that he would receive payments from the Oregon estate "without  
2 confiscation, in whole or in part, by the governments of such  
3 foreign countries." Id at 430. The Supreme Court noted that it  
4 had earlier refused to invalidate a similar statute enacted by  
5 California "on its face" because that statute would have only "some  
6 incidental or indirect effect in foreign countries." Id at 432-33  
7 (quoting Clark v Allen, 331 US 503, 517 (1947)). In Zschernig,  
8 however, the Court assessed "the manner of [the Oregon statute's]  
9 application" and observed that the law had compelled state courts  
10 to "launch[] inquiries into the type of governments that obtain in  
11 particular foreign nations." 389 US at 433. The Court noted, for  
12 example, that the statute triggered assessments of "the actual  
13 administration of foreign law" and "the credibility of foreign  
14 diplomatic statements." Id at 435. In short, the statute "seemed  
15 to make unavoidable judicial criticism of nations established on a  
16 more authoritarian basis than our own." Id at 440. Looking at these  
17 effects of the Oregon statute, the Court concluded that it was  
18 unconstitutional because it "affected international relations in a  
19 persistent and subtle way," had a "great potential for disruption  
20 or embarrassment" and triggered "more than 'some incidental or  
21 indirect effect in foreign countries.'" Id at 434-35, 440.

22 Zschernig thus stands for the proposition that states may  
23 legislate with respect to traditional state concerns, such as  
24 inheritance and property rights, even if the legislation has  
25 international implications, but such conduct is unconstitutional  
26 when it has more than an "incidental or indirect effect in foreign  
27 countries." Id at 440. As the First Circuit recently observed,  
28 under Zschernig, "there is a threshold level of involvement in and

1 impact on foreign affairs which the states may not exceed."

2 National Foreign Trade Council v Natsios, 181 F3d 38, 49-57 (1st  
3 Cir 1999), aff'd on other grounds sub nom, Crosby v National  
4 Foreign Trade Council, 530 US 363 (2000).

5 But Zschernig, and the foreign affairs power it  
6 announced, has its limits. Only a handful of state or local laws  
7 have been struck down under Zschernig, and these laws have  
8 typically singled out foreign nations for regulation. See, e g,  
9 Natsios, 181 F3d 38, 53 (finding that the Massachusetts Burma Law,  
10 which restricted the ability of Massachusetts and its agencies from  
11 purchasing goods or services from companies that did business with  
12 Burma (Myanmar), was unconstitutional, in part, as a "threat to  
13 [the] federal foreign affairs power"); Tayyari v New Mexico State  
14 University, 495 F Supp 1365, 1376-79 (D NM 1980) (striking down a  
15 university's policy designed to "rid the campus of Iranian  
16 students" because it conflicted with a federal regulation and  
17 "frustrated the exercise of the federal government's authority to  
18 conduct the foreign relations of the United States"); Springfield  
19 Rare Coin Galleries, Inc v Johnson, 115 Ill 2d 221 (Ill 1986)  
20 (invalidating an Illinois statute that excluded South Africa from a  
21 tax exemption as more than an "incidental" intrusion on the federal  
22 government's foreign affairs power); Bethlehem Steel Corp v Board  
23 of Commissions, 276 Cal App 2d 221 (1969) (invalidating a  
24 California Buy American statute because it had "more than 'some  
25 incidental or indirect effect in foreign countries' and \* \* \* great  
26 potential for disruption \* \* \* .").

27 The Ninth Circuit's decision in Deutsch v Turner Corp,  
28 324 F3d 692 (9th Cir 2003), sheds light on the present issues.

1 Deutsch affirmed this court's decision in In re World War II Era  
2 Japanese Forced Labor Litig, 164 F Supp 2d 1160 (ND Cal 2001),  
3 finding preemption of a California law that created a cause of  
4 action for victims of World War II slave labor. The Ninth Circuit  
5 stated that California had "sought to create its own resolution to  
6 a major issue arising out of the war - a remedy for wartime acts  
7 California's legislature believed had never been fairly resolved."  
8 Id at 712. Because the power to make and resolve war included the  
9 authority to resolve war claims, the California scheme was  
10 preempted by the federal scheme. Id at 714. As this court  
11 observed, the statute's terms and legislative history "demonstrate  
12 a purpose to influence foreign affairs directly" and "target[]  
13 particular countries," as "California intended the statute to send  
14 an explicit foreign relations message, rather than simply to  
15 address some local concern. In re WWII, 164 F Supp 2d at 1173,  
16 1174.

17 In contrast to the law in Deutsch, none of the state laws  
18 the government seeks to preempt was enacted to influence foreign  
19 affairs. Nor can it be said that any state has attempted to  
20 "establish its own foreign policy." 389 US at 441. Instead, the  
21 laws underlying the state investigations are directed at more  
22 mundane, local concerns such as utility regulation and privacy,  
23 traditional realms of state power.

24 Nor is there a basis for concluding that the  
25 investigations of the carriers will have significant impact on the  
26 government's relations with any foreign nation. In this regard,  
27 Int'l Ass'n of Indep Tanker Owners v Locke, 148 F3d 1053, 1068 (9th  
28 Cir 1998), is instructive. The Ninth Circuit in Locke rejected out

1 of hand the argument that onerous regulations on oil tankers  
2 promulgated by the state of Washington were unconstitutional under  
3 Zschernig because the litigant "failed to demonstrate that, even if  
4 [those] regulations [had] some extraterritorial impact, that impact  
5 [was] more than 'incidental or indirect.'" Locke, 148 F3d at 1069  
6 (quoting Zschernig, 389 US at 434). Akin to the regulations in  
7 Locke, the state investigations may have an effect on foreign  
8 affairs, but that effect is only incidental and indirect. See  
9 Zschernig, 389 US at 433.

10  
11 D

12 Finally, the court takes up how the state secrets  
13 privilege bears on the state officials' investigations. The  
14 Director of the NSA, General Keith B Alexander, has concluded that  
15 permitting the investigations to proceed would interfere with the  
16 national security operations of the government. Doc #265, Ex A.  
17 Alexander's declaration explains that each of the "five of the  
18 state proceedings \* \* \* seek, at a minimum, information regarding:  
19 (1) whether specific telecommunication carriers assisted the NSA  
20 with an alleged foreign intelligence program involving the  
21 disclosure of large quantities of records pertaining to customer  
22 communications; and (2) if such a program exists, the precise  
23 nature of the carriers' alleged involvement and details concerning  
24 the alleged NSA activities." Doc #265, Ex A, ¶ 16. According to  
25 Alexander, confirming or denying "allegations concerning  
26 intelligence activities, sources, methods, relationships, or  
27 targets" would harm national security in various ways. Id, ¶ 17.

28 //

1 In view of this court's analysis in Hepting v AT&T Corp,  
2 439 F Supp 2d 974 (ND Cal 2006), the court notes – and the state  
3 officials acknowledge – that some of the information sought in  
4 these investigations may implicate the state secretes privilege.  
5 Conversely, some questions posed in these investigations fall  
6 outside the privilege's scope, a point the government conceded at  
7 oral argument. With further guidance from the Ninth Circuit, the  
8 court will be able to decide whether and to what extent the state  
9 investigations may proceed. Accordingly, the court declines to  
10 rule on the state secrets issue pending the Ninth Circuit's  
11 decision in Hepting v AT&T Corp.

12  
13 IV

14 In sum, the government's summary judgment motion is  
15 DENIED WITHOUT PREJUDICE to its renewal following the Ninth  
16 Circuit's decision in Hepting v AT&T. The court also DENIES AS  
17 MOOT the state officials' motions for summary judgment. After the  
18 Ninth Circuit issues an order in Hepting, the parties may renotece  
19 their cross motions.

20  
21 IT IS SO ORDERED.
